

## **LOVE NEVER DIES**

Don't you just wish that sometimes you could forget  
When the pain's too much but she ain't left you yet  
And you're ready to get on with another new life  
But the old one is cutting you like a surgeon's knife

**Love never dies love never dies**

**Even when your heart has been split in two**

**And you're cursing the sound, the sound of her name**

**Love never dies and it's a goddamned shame**

Even when you've started and happiness has come  
Somewhere down in the depths she still holds a gun  
And it's pointed right straight, straight at your head  
She's nothing but history but you're still being bled

### **chorus**

Love is a mystery none of us will ever pierce  
No way you can beat it, gentle or fierce  
And if you can't beat it, join it, so I've heard them say  
I tell you I've tried that, and it is not the way

### **chorus**
